To whom this may concern,

I am writing to express my interest in the position of Junior Web Developer.

While currently enrolled on a full-stack software development course, I have found a passion for front-end web development as a way to express my creative skills and hobbies. For the past 6 months while on this course, I have built, designed and maintained a number of web applications as well as worked collaboratively on projects with other students and alumni, including a Hackathon in partnership with Trust in SODA to build a web-application encouraging accessibility in the workplace. I am due to graduate at the latest April 2022, however I am currently 3 months ahead of schedule while working through the course material.

My current grades so far:

HTML & CSS – Distinction

JavaScript – Merit

Python – Distinction

I have two more projects to submit: Full-stack frameworks and E-Commerce, and on the possibility of gaining the opportunity to become a Junior Web Developer before I graduate, I would continue the course and complete the material in a part-time capacity, as I have done over the past 6 months while working Full-Time for the NHS.

Due to my long work-history and accumulation of life skills, I have outstanding problem solving skills, as well as an abundance of 'soft-skills'. I also have a strong (and increasing) knowledge of the programming languages I have been lucky enough to learn so far: JavaScript, CSS, HTML and Python, as well as Frameworks and Libraries such as Flask, Django and jQuery. Over the coming years I hope to increase my knowledge further of these languages as well as supplement my knowledge with other languages such as PHP and Java as well as frameworks/libraries such as React, Angular and Vue. I have a thirst for knowledge and increasing skills; a career in Software Development would allow me to continually learn and thrive in an environment that would be challenging, enriching, and rewarding.

I have excellent communication skills with the ability to work directly with clients to provide outstanding customer service. During my time in the NHS I have developed confidence in communicating with senior members of staff such as Consultants and management. I have also become extremely knowledgeable in carrying out and developing documentation with regards to the Quality Assurance and Testing of machinery in the Radiology Department, ensuring all machinery works as it should without any problems. All members of staff now follow the Quality Assurance procedures using documentation that I have designed and developed in order to ensure safe and accurate delivery of radiation to patients.

I am an advocate for high levels of UI/UX design, for each of my projects I always ensure a positive user experience by completing wireframes, mock-ups and sketches of the visualised finished product. When designing and creating web applications I am a conscientious designer in terms of accessibility for the users, ensuring the product is fit for purpose for all members of the community and any potential client/visitor. I am confident in using front-end frameworks such as Bootstrap and Materialize as well as pure vanilla CSS to ensure a responsive web-application across all screen sizes, to create a progressive web application.

Please see my online resume for links to projects:

EXECUTIVE SUMMARY

Motivated, friendly and approachable individual who loves nothing more than helping to resolve problems. Currently enrolled on a full-stack software development course actively looking to gain entry into the software development industry as a full time career. I am confident when handling customer enquiries, complaints and communications when in a face-to-face role as well as over the telephone or video-call. I am able to work to deadlines and meet targets in an effective and timely manner and can manage multiple workloads. I am looking for a suitable position within a company that provides a nourishing working environment which gives me the freedom to do a great job and can support me in achieving future ambitions as well as continue to develop the knowledge that I already have.

WORK EXPERIENCE

Radiology Assistant Practitioner

June 2015—Current

NHS East Lancashire Teaching Hospitals Trust

- Carried out daily quality checks on radiography equipment to ensure and maintain the safe and effective delivery of radiation to produce diagnostic images.
- Carried out more in-depth quality assurance to ensure all equipment is working within specified limits as set by IR(ME)R and IRR regulations.
- Created an in-depth quality assurance baseline document to allow future quality assurance tests to be mapped and tested against up-to-date data.
- Kept up to date with current legislation and guidelines surrounding the safe delivery of radiation to patients to produce diagnostic images while keeping radiation doses to staff, patients and visitors to a minimum.
- Troubleshoot equipment and raise fault logs with the relevant parties to ensure all machinery working to the highest standard.
- Log all faults in the relevant databases to have an electronic record of all the machinery technical errors - whether software or hardware.
- To acquire images of the highest quality to aid in the diagnosis and treatment of pathologies.
- To work directly with other departments in the trust to arrange and organise workflow within the radiology directorate.

Front of House Customer Service Assistant

April 2011—June 2015

ASDA, Southport

- Meeting targets set by the company in terms of speed of service and standard of service measured by mystery shop standards.
- Being a reliable and friendly member of the team, responsible for till overrides and cash drops as well as helping customers with any queries they have, maintaining a professional and positive attitude at all times.

Fundraising and Patient Care Volunteer

September 2008—August 2010

Queenscourt Hospice, Southport

- Working as part of a team to raise funds for the hospice, by organising fundraising events such as the 'Star Trek' 5k walk along Southport sea-front and carrying out all necessary documentation such as processing the application and sponsor forms submitted by the participants.
- Assisting the nursing staff in the care of the patients who are in the palliative stages of care, while maintaining a caring and sensitive attitude towards the patient and their family.
